To Whom it May Concern,

This letter is to confirm that Colbrow Medics is providing healthcare services and training courses.

We provide adult learning from the HLT (Health) training package of the vocational education and training (VET) sector and specific industry groups.

Our courses are for:

- First aid training where required for COVID response
- Study for health care workers
- Aged and disability care
- Assessments for safe working practice and infection control

We have modified courses to have all theory completed as online learning at home. There are still practical assessments that are required to be undertaken in person. We have modified all sessions to ensure student are in face to face environments for short periods only. Class sizes are limited to ensure social distancing and square metre rules can be applied.

Students must travel to our training locations to undertake practical assessments. We ask that students re-book if they are unwell or under a personal direction to isolate.

The course delivery cannot be delayed due to our workforce currently working in healthcare environments.

This letter can be used in conjunction with an 'Order & Tax Invoice' confirmation email stating the student name, course, date and location.

Further information is available at www.firstaidevents.com/courses

Regards,

David Wrobel
Operations Manager
